products designed & manufactured  
by professionals

## WIRING DEVICES

# OUTLETS

# RESIDENTIAL GRADE RECEPTACLE

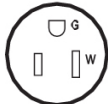

## Benefits

- Meets 2017 NEC requirement for tamper resistant and weather resistant.
- Available in standard duplex style or decorative style.
- Captive mounting screws.
- Push wire accepts #14 AWG solid copper wire only.
- Side and back wire accepts #12 - #14 AWG solid.
- High impact-resistant thermoplastic construction.
- Flammability rating is V-2 per UL94.
- Back and side terminal wiring options for ease of installation.
- Self grounding.

## Types of Outlets

### Residential Grade - Duplex Receptacles, 2-Pole, 3-Wire Grounding

Photo	Model	Rating (A.V.)	Function	Wiring Style	Grounding	NEMA

# SWITCHES

Residential & Commercial Grade

### Decorative Switch

- Accepts #12 and #14 AWG
- Push wire #14 AWG
- High-impact resistant thermoplastic construction
- Narrow back body leaves more space for wires in the box
- Smooth, quiet paddle action
- Easy-access green hex head ground screw
- Tri-drive ground, terminal and mounting screws
- Self-grounding models provide automatic ground clip

### Toggle Switch

- Thermoplastic toggle and enclosure
- High-impact resistant construction
- Side wire #12 and #14 AWG
- Push wire #14 AWG
- Tri-drive ground, terminal and mounting screws
- Easy-access green hex head ground screw
- Smooth, quiet toggle action
- Self-grounding models provide automatic ground clip

## **ROCKER SWITCH SLIDE DIMMER**

# ROCKER SWITCH SLIDE DIMMER

## Wi-Fi Connection

Support Wi-Fi connection

## Mode Switch

Mode 1 - Adjust by 5%  
Mode 2 - Adjust by 25%  
Mode 3 - Adjust by initial brightness

## Mechanical Backup Switch

Conform with UL standard

**Incandescent Lamp**  
600W / 120V

**CFL Lamp**  
300W / 120V

**Dimmable LED Lamp**  
300W / 120V

*Note: LED lamps are classified as dimmable and non-dimmable.  
Please make sure your LED lamp is dimmable.*

## Features and Benefits

- Adjustable initial brightness setting for different type of lights.
- Compatible with 99% of light bulbs on the market today.
- Tough thermoplastic housing shrugs off impacts and is scratch proof.
- Modern ergonomic element incorporates with compact design saving more room for junction box and match your deco style.
- Location indicator LED light, options on/off status for personalized demand.
- Energy saving & long operating life.

## Type of Dimmers

### Traditional Dimmer Switch

Photo	P/N	Rating	Description	Load Capacity	Option
	D3DWH	120V, 60Hz	Traditional slide dimmer on/off switch	Incandescent 600W CFL 300W LED 300W	Single pole

# POWER OUTLETS

## Features and Benefits

- Range and dryer devices offer heavy-duty connections in either surface mount or flush mount configurations.
- Heavy gauge galvanized steel mounting strap for corrosion resistance.
- Flush receptacles are completely ready-to-wire, shorten installation time significantly.
- Surface receptacles with adjustable cord clamp allow for wiring.
- Receptacles for use with copper or aluminum wire.
- Flush receptacles fit two-gang enclosure.

## Specifications

- 3 and 4 wire configurations.
- Power outlets are 30A or 50A configurations.
- Operating temperature is from -40°C to 60°C.
- Terminal accepts #10, #8 to #4 AWG.
- Flammability rating is V-2 per UL94.
- Flush and surface receptacles accept both copper or aluminum wire.
- Nylon housing provides high impact resistance.

## Types of Outlets

### Flush Mount Power Outlet, 3-Pole, 4-Wire Grounding

# USB CHARGER DEVICES

# HIGH-RATED USB RECEPTACLES

USB Receptacle with Type-A & Type-C ports and also with power of 25W, 27W and 30W

## Features and Benefits

- High quality, high energy efficiency USB receptacles provide a smart choice in the fast charging solutions.
- USB receptacles with both Type A USB port for charging phones / tablets and Type C USB port for charging newer and future devices.
- Meanwhile, it charges faster with more watts and higher current.

### CC / CV (Constant Current / Constant Voltage) Mode Control

As many different types of electronic devices need constant voltage or constant current to operate, USB ports support the way to change the mode of CC / CV in different situations to ensure the process of charging in the good way.

### Backflow Protection

It provides the protection to prevent the electric current flow back from your devices to power supply.

### Overheating Protection

Build in one heat-sensing component to shut down the charger when excessive heat is generated within the USB receptacle, halting the temperature climb before it damages the device.

### Smart Chip and Faster Charging

USB receptacles feature a smart chip that recognizes and optimizes the charging power of your electronic devices for fast and efficient charging of tablets, phones, gaming devices, e-readers and a host of other electric devices.

# GFCI RECEPTACLE

with Self-Test Function

These GFCI protective devices meet and/or exceed UL 943 requirements for end of life and auto-monitor function. The GFCI conducts an automatic test to determine continued GFCI protection. In an event that the GFCI can no longer provide ground fault protection, the GFCI will automatically interrupt power and/or provide visual indication of impairment, requiring replacement of the protective device.

## Applications

- **Residential** - kitchens, bathrooms, garages, basements, laundry rooms, wet sinks and other wet locations around the house.
- **Educational Facilities** - classrooms, restrooms, laboratories, dormitories and kitchens
- **Airports** - public bathrooms, general-use and maintenance areas
- **Restaurants, Lodging and Retail Malls** - public bathrooms, general-use and maintenance areas
- **Commercial Offices** - bathrooms, basement areas, hallways and kitchen facilities
- **Public Areas** - wherever receptacles are located near wet or damp locations

## Features and Benefits

- GFCI detects ground fault and trips to provide protection during its whole life period.
- The GFCI receptacles conduct an auto-monitor function self-test every five seconds exceeding UL 943 requirements for a frequency of 3 hours.
- Excellent electronic design to minimize any false energization.
- Miswire protection interrupts power in an event that the GFCI receptacle is miswired by interposing line and load branch circuit supply wiring. The GFCI receptacle will deny power to receptacle face and downstream.
- Robust electronic design to minimize any false or unwanted nuisance tripping from high frequency noise to maintain continued in-service.
- Quality electronics provide the GFCI with a superior immunity to electrical surges and over-voltage events.
- Innovated reset disabled system motivated the GFCI cannot be reset once it reaches "end of life"
- Super fine LED indicator light has the one-way indication for GFCI properly working condition. "Glimpse" design to minimize unnecessary light during sleeping hours.
- Extra-large silver-alloy contractor with great alignment to ensure the GFCI have the superior resistance to dielectric, overload as well as the abnormal operations.
- Advanced "Build two-in-one of twin solenoid" and "Double SCR" design provides GFCI extended service life.

### Innovative Dual Protection System

Twin solenoid and double Silicon Controlled Rectifier (SCR) ensure an always-on GFCI protection to ground fault.

### Green LED Indicator

Know the GFCI working status at a simple glimpse.

### Ultra-Compact Design

Leave more room for wiring in an electric box.

### High Impact Resistant Material

Thermoplastic material and rational structure design ensure superior strength and durability.

#### Material Characteristics

- Environmental: Flammability UL-94 V2 Rating.
- Material: Face, Body, Polycarbonate.

### Self-Test Function

Automatically conducts a self-test every 5 seconds, ensuring it is always ready to provide protection.

### Durable and Long Service Life

Withstands higher voltage surge than UL943 requirements.

### Tamper-Resistant

Automatic shutter system prevents young children from inserting unwanted objects into the outlets.

### Easy to Know it's End-of-life

- Repeatedly trips when RESET is attempted
- Does not permit power to the load with an audible "clicking" sound ; or
- Denial of power to the load (trip with the inability to RESET).

## Features and Benefits

- UL and CUL listed.
- Operating Temperature: -31°F (-35°C) to 151°F (66°C).
- Mounting screws are captive, saving installation time.
- Color matching thermoplastic wall plat is provided as per customers option.
- Class A GFCI meets or exceeds the maximum allowable trip clearing times per UL 943.
- "Ultra-Compact Profile" ensures additional wiring space to wire products to provide excellent alignment and mounting ease of GFCI receptacles.

## Weather-Resistant Receptacles

- Meets 2017 NEC Code Requirements.
- Listed to the weather-resistant supplement of UL498, meeting UL requirements including:
  - Ultraviolet light exposure test.
  - Cold impact test
  - Accelerated aging test
- Stringent material requirements for current-carrying parts, wire screws and mounting straps to ensure superior corrosion resistance.
- Receptacles still require a weatherproof cover in the wet or damp locations.
- WR marking on the face as required by UL standard.

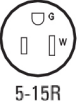

## Tamper-Resistant Receptacles

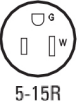

- Protection is always there with tamper-resistant receptacles. It is reliable, automatic and permanent.
- Spring-loaded shutter mechanism restricts access to an object in any one side of the receptacle.
- Insertion of a two or three bladed plug will open the shutters, allowing electrical contacts.

## Types of GFCI Receptacles

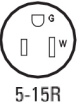

### Self-test GFCI Receptacle

Photo	P/N	Rating (A.V.)	Description	NEMA

## OCCUPANCY & VACANCY

Light up your home in a gentle night

Top View

Side View

### Manual Light Switch

The whole cover could be used as a manual light switch and is removable to access setting controls

### Adjustable Light Level

Detect ambient light to adjust lamp brightness

### Adjustable Sensitivity

from 20% to 100%

### Adjustable Delay Time

from 30 seconds to 30 minutes

### PIR Motion Detector

Only detect human body movement, reduce false triggers from pets

### Incandescent Lamp

600W, 120-277V

### CFL Lamp

300W, 120-277V

### Dimmable LED Lamp

300W, 120-277V

## Features and Benefits

- Low noise and high sensitivity
- Automatic ON or manual ON is optional
- Automatic OFF
- 180° coverage of up to 900 sq. ft.
- Adjustable sensitivity from 20% to 100%
- Adjustable time delay from 15 seconds to 30 minutes
- Pet immunity (reduce false triggers)
- Detect ambient light to adjust light's brightness
